15 TO 17 DECEMBER: CODE RED VERSUS THE AVIATION INDUSTRY

It is no secret that **aviation** is disastrous for the climate, relies on jobs with difficult working conditions and has a detrimental impact on nature, agriculture and health. Yet the industry still benefits from countless tax breaks and millions in subsidies. As a result, aviation continues to grow, miles beyond planetary boundaries.

All to the benefit of the 1% responsible for more than half of its emissions, while the Global Majority pays the price.

It is high time to put the aviation industry in check and make a radical U-turn, putting **people and planet first**.

From 15 to 17 December, we therefore embark on a **mass action** for social and climate justice, against the aviation industry.
