# CODE ROUGE - ROOD

**Extreme weather, flooded houses, threatened crop yields and soaring fuel and energy bills.** We are paying a high price for our dependence on oil, gas and coal, a dependence which also fuels **wars and human rights abuses around the world.**

At the same time **the large, historically polluting fossil fuel companies are making huge profits**, while the workers in this sector are left in a limbo as to their future.

Time is running out, the challenge is enormous, but a livable and socially just future is within our reach! It's time to move up a gear! A coalition of citizens, NGOs and local action groups united in their will to act, **Code Red ([www.code-rouge.be](http://www.code-rouge.be)) needs you!**

Our first major mobilisation is targeting **TotalEnergies**, the fossil fuel giant that continues to make billions in profits, at the expense of households and the climate, and **continues to invest in fossil fuels.**

**8-9/10/2022**
